

# INSTRUCTIONS

## Awesome Alpacas

YEAR 5-10

## PIEFA Food and Fibre Card Game Australian Alpaca Association Supply Chain

This resource has been developed by:

## AUSTRALIAN CURRICULUM CONTENT

### ➤ YEAR 5-6

Explain how and why food and fibre are produced in managed environments ([AC9TDE6K03](#))

Investigate needs or opportunities for designing, and the materials, components, tools, equipment and processes needed to create designed solutions ([AC9TDE6P01](#))

Investigate how scientific knowledge is used by individuals and communities to identify problems, consider responses and make decisions ([AC9S5H02](#), [AC9S6H02](#))

Locate, collect and organise information and data from primary and secondary sources in a range of formats ([AC9HS5S02](#), [AC9HS6S02](#))

### ➤ YEAR 7-10

Analyse how people in design and technologies occupations consider ethical and sustainability factors to design and produce products, services and environments ([AC9TDE8K01](#))

Analyse how food and fibre are produced in managed environments and how these can become sustainable ([AC9TDE8K04](#))

Analyse needs or opportunities for designing, and investigate and select materials, components, tools, equipment and processes to create designed solutions ([AC9TDE8P01](#))

Generate, test, iterate and communicate design ideas, processes and solutions using technical terms and graphical representation techniques, including using digital tools ([AC9TDE8P02](#))

Analyse and make judgements on the ethical, secure and sustainable production and marketing of food and fibre enterprises ([AC9TDE10K04](#))

This resource has been developed by:

## Game Objectives

By participating in a hands-on card game, students will learn to sequence the process of converting fibre from alpacas on a farm into an end product suitable for sale. Additionally, they will gain an understanding of technologies and the careers involved in the supply chain.

The supply chain game cards can be printed from this document and can also be accessed in the following lessons:

- > Year 5-6, Lesson 3
- > Year 7-10, Lesson 3 and Lesson 4

## Resources and Equipment

### PACK CONTENTS

- > 48 game cards

#### Arrow cards

19 x Arrow game cards

#### Step cards

15 x Step game cards

#### Career cards

7 x Career game cards and  
1 x Career game card template

#### Scan cards

2 x QR Code game cards

#### Technology cards

1 x Technology game card and  
3 x Technology game card templates

This resource has been developed by:

## ▶ GAME 1 - THE SUPPLY CHAIN FLOWCHART

1. Approximately 2 - 4 players
2. Butchers paper and markers
3. Individual computer/digital device access
4. Wool Production and Processing (3:10)
5. Why Alpaca is the Smart Future for Australia  
(0:00-4:25 for year 5-6 and 0:00-7:07 for year 7-10)
6. PIEFA Food and Fibre Card Game | Australian Alpaca Association Supply Chain Game Cards  
(printed, cut into individual cards and preferably laminated)
7. Extension: Australian Alpaca Association
8. Extension: Job Boards for Agriculture

### Objective

To create a flowchart of the alpaca supply chain in the correct order.

### Game play

1. Players watch the video on sheep wool/fibre production and processing Wool Production and Processing (3:10).
2. During the video, players will create a flowchart on butchers paper, showing the journey of alpaca fibre from the farm to a high quality alpaca end product, such as a garment, blanket, accessory, etc.
3. Players will include the name of the step or process in the supply chain and use arrows between each step to show the path of the product.
4. Players place all the *step*, and *arrow* game cards face up and sort them into two piles:
  - *Step* game cards (  ) and
  - *Arrow* game cards (  )
  - Remove and reserve the *career* (  ), *technology*, and *QR code* (  ) game cards.
5. Players collaborate and organise the cards into a supply chain by placing the *step* game cards into their sequential order and arranging the *arrow* game cards between each step to create a supply chain flowchart.
6. Players check answers with their teacher.

This resource has been developed by:

### Extension 1 - Careers

- a) Players take the *career* cards from the reserved cards from step 4.
- b) Using the completed flowchart, place the *career* game cards adjacent (next to) to the step they are associated with on the completed flowcharts.
- c) Research careers that occur along the supply chain. Students may use the [Australian Alpaca Association website](#), [Job Boards for Agriculture](#) or an internet search engine.
- d) Design a card for another career related to the supply chain by filling in the provided areas of the blank template. Players can use the other *career* game cards as a model for their design.
- e) Place the newly designed *career* card adjacent to the step associated with the career on the flowchart.

### Extension 2 - Technology

- a) Players take the *technology* card from the reserved cards in step 4. Using the completed flowchart, place the technology game card adjacent (next to) to the step they are associated with on the completed flowcharts.
- b) Research a technology used in any part of the supply chain to improve productivity, speed up a job, produce higher quality fibre, etc.
- c) Using the supplied *technology* cards as a model, design three or more *technology* cards using the templates and cut them out. Include a description of the technology, a picture, and an explanation of how the technology is advantageous on each card template.
- d) Using the completed flowchart, place the newly designed *technology* game card adjacent (next to) to the step it is associated with on the supply chain

15 x Step game cards

**Farm**

CONSIDERATIONS:  
 Farms are areas of land used to raise plants and animals for food and fibre. Animals, such as alpacas, are cared for on a farm. They are managed so that they are stress-free, protected from predators and have all of their needs met.

Step   
CARD GAME

x15

2 x QR Code game cards

Australian Alpaca ASSOCIATION

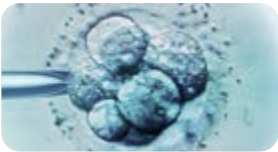

Scan the QR code to discover how the Australian Alpaca Association is helping to build a successful and sustainable alpaca industry in Australia.

Scan   
CARD GAME

x2

4 x Technology game cards

**Artificial Breeding**

CONSIDERATIONS:  
 Embryo transfer involves transferring a fertilised egg (ova) from a high quality female donor alpaca to a recipient female, who then gives birth and rears the cria. This means that more offspring can be produced from the genetically superior mother.

Technology   
CARD GAME

x4

8 x Career game cards

**Scientist**

CONSIDERATIONS:  
 Scientists research, gather and use evidence to make and test hypotheses to gain and share understanding and knowledge. An understanding of the science of fleece production can be applied to selective breeding programs, to produce stock that produces fleeces with higher quality, and more consistent fleeces.
